The Future of Nursing Institute of Medicine,Committee on the Robert Wood Johnson Foundation Initiative on the Future of Nursing, at the Institute of Medicine,2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

**Student Debt** Sandy Baum, 2016-07-20 This book analyzes reliable evidence to tell the true story of student debt in America. One of the nation's foremost experts on college finance, Sandy Baum exposes how misleading the widely accepted narrative on student debt is. Baum combines data, research, and analysis to show how the current discourse obscures serious problems, risks misdirecting taxpayer dollars, and could deprive too many Americans of the educational opportunities they deserve. This book and its policy recommendations provide the basis for a new and more constructive national agenda to make paying for college more manageable.

*Testimonios: Stories of Latinx and Hispanic Mathematicians* Pamela E. Harris, 2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

*Top Student, Top School?* Alexandria Walton Radford, 2013-05-02 Most of us think that valedictorians can write their own ticket. By reaching the top of their class they have proven their merit, so their next logical step should be to attend the nation's very best universities. Yet in *Top Student, Top School?*, Alexandria Walton Radford, of American Institutes for Research, reveals that many valedictorians do not enroll in prestigious institutions. Employing an original five-state study that surveyed nine hundred public high school valedictorians, she sets out to determine when and why valedictorians end up at less selective schools, showing that social class makes all the difference. Radford traces valedictorians' paths to college and presents damning evidence that high schools do not provide sufficient guidance on crucial factors affecting college selection, such as reputation, financial aid, and even the application process itself. Left in a bewildering environment of seemingly similar options, many students depend on their parents for assistance—and this allows social class to rear its head and have a profound impact on where students attend. Simply put, parents from less affluent backgrounds are far less informed about differences in colleges' quality, the college application process, and financial aid options, which significantly limits their child's chances of attending a competitive school, even when their child has already managed to become valedictorian. *Top Student, Top School?* pinpoints an overlooked yet critical juncture in the education process, one that stands as a barrier to class mobility. By focusing solely on valedictorians, it shows that students' paths diverge by social class even when they are similarly well-prepared academically, and this divergence is traceable to specific failures by society, failures that we can and should address.
