**Service-Learning to Advance Access & Success** Travis T. York,Alan S. Tinkler,Barri E. Tinkler,2018-11-01 Throughout the 90s and early 2000s, service-learning research was intensely focused on the student outcomes. That body of research has effectively brought service-learning from the fringes into the mainstream of institutionalized pedagogies. In the past decade service-learning research has experienced an infusion of exploration in three distinct ways: first, large-scale quantitative methodologies; second, a proliferation of research that has explored how different sub-groups of students experience the pedagogy differently, thusly resulting in variation among outcomes; and third, a focus on the experiences and outcomes associated for communities and community partners engaged in service-learning. In an effort to support these movements, this volume of the Advances in Service-Learning Research series, Service-Learning to Advance Access & Success: Bridging Institutional and Community Capacity, focuses on how service-learning can advance access and success. Not simply access and success of students, but the ways that service-learning can advance access and success for all through bridging institutional and community capacity building. The chapters in this volume serve as a testament to the ways in which service-learning research continue to be advanced by thoughtful scholar-practitioners. The 12 chapters included in this volume are organized into three sections. The first section focuses on how institutional and community partnerships can be leveraged to build community capacity. The second section focuses on how institutions might build their own capacity to effect change for the good of society. The third and final section focuses on six studies exploring the relationship service-learning pedagogy has with access and success for students. Of the six studies, three are situated within the context of teacher-preparation programs.

Teamwork Glenn Parker,2009 In Volume I of The Parker Team Series, Teamwork:20 Steps to Success, acclaimed author Glenn Parker states that Successful teamwork requires doing lots of 'unspectacular little things, ' such as having a clear purpose, building effective relationships, honoring your commitments, and an obsessive concern for communicating information. This quick, easy-to-read title is full of the information required to conduct teams in a more effective manner, including job aids and assessments. Teamwork:20 Steps to Success is the perfect primer for any type of team, from on-site, existing teams to brand-new.

**Team Work** Russ Sarratt,Rusty Chadwick,2020-11-24 The modern workplace is built on teamwork, but for many workers this structure feels like a necessary evil—an impediment rather than a perpetuator of success and fulfillment. The traditional approach to teamwork often pits individuals against one another with a “me-first” mentality, leading to dysfunctional teams

that fail to accomplish their purpose. Fortunately, there is a better way to work. In this salient book, Russ Sarratt and Rusty Chadwick provide a framework for a different kind of team—one where personal excellence and sacrificial service at the individual level changes the narrative of the larger group. No matter the industry or profession, the success of a team and the fulfillment of its members depend on each individual's ability and desire to contribute. Team Work introduces 13 timeless principles of teamsmanship—simple but transformative values that are revolutionizing the way teams function. Whether at work, at home, on the athletic field, or in the community, the principles of Team Work will help you develop a clear understanding of how to move your team forward and thrive in the process.

*Critical Literacy Pedagogy for Bilingual Preservice Teachers* Hyesun Cho, 2018-02-15 This book presents a participatory action research study exploring the social identity and academic literacies of bilingual preservice teachers. It describes the transformative experiences of undergraduate students during their participation in a program specially designed to develop bilingual teachers in Hawaii, USA. Further, it discusses how the curriculum and instruction in the classroom provide a 'third space' for facilitating peer interaction and critical reflection on such issues as academic literacy, heritage language education, and teacher identity. In doing so, it connects ideas of social identity and academic literacies of bilingual preservice teachers to the "real work" of mentoring and teaching PreK-12 students themselves.

Building Top-Performing Teams Lucy Widdowson, Paul J Barbour, 2021-01-03 The best way for a business to succeed is through its people. While there are gains to be had from streamlining processes, reducing costs or making a strategic change, the biggest potential for success comes through how humans collaborate. Specifically, the greatest gains are achieved through high performing teams, and teams of teams. Containing more than 40 tools which can be used in a virtual or in-person coaching environment, Building Top-Performing Teams is a practical guide for leaders, HR professionals, coaches, team coaches and anyone with management responsibility. Teaching and Learning Building Design and Construction David Dowdle, Vian Ahmed, 2013-10-18 Innovation in building design and construction depends on innovative strategies being developed by teachers and practitioners, made available to students and then professionally adopted. Successful transfer of this knowledge relies on appropriate support for both students and academics to ensure the new knowledge is translated into a format appropriate to the learner's current state of understanding, often using a constructivist, student-centred learning approach. This special issue of the journal Architectural Engineering and Design Management examines new strategies to manage effectively a growing number of students and a changing student profile in the built environment sector. Written by international experts in the field, core themes covered include student-centred learning, practice-based learning, good practice and evaluation, and instructional systems design. Several papers are devoted to virtual learning, focusing on e-pedagogy, standardisation, bridging the gap between academia and industry, and virtual learning environments. This peer-reviewed publication will be invaluable reading for lecturers and students on architecture and civil engineering courses, professional architects and engineers, and all interested in T&L, continuing professional development and distance learning in the built environment sector.

**People Leadership** Gina Folk, 2015-04-22 Do you find yourself and your employees less engaged and less productive in the workplace than you would like? According to a Gallup poll, more than 70 percent of the American workforce today is “unengaged”—which means that most of the people in your organization are only showing up to work to go through the motions and collect their paycheck. But there’s something you can do to change that. In People Leadership, Gina Folk covers thirty proven techniques that she learned and utilized during a twenty-five-year career managing people at a Fortune 500

company. Unlike many of the leadership theories you'll find out there, Folk's teachings have been implemented and shown to work with real people in real situations. Using Folk's practices, any individual charged with managing or supervising others at any level can learn to re-engage their employees and improve their company's productivity—and become the boss they've always wanted to be.
